

Features

- UL® Listed 
- Heavy-duty bronze clamp with stainless steel hardware
- Suitable for direct burial
- Permits cross runs and an additional pigtail conductor
- Single bolt design permits fast and easy installation
- Available pedestal-mounting bracket simplifies retrofit installations
- Accommodates any combination of #4 or #6 AWG solid or stranded wire

Signal Reference Grid Connector

Specifications for SRGC46 & SRGC46BR

The ERITECH® Signal Reference Grid (SRG) Connector allows for fast, simple and economical field construction of wire signal reference grids used in computer-room grounding. In addition to cross-wire connections, each connector will also accommodate an additional pigtail that can be used to connect the grid to pedestals, building steel and equipment. A raised-floor pedestal-mounting bracket is also available to simplify retrofit installations. This UL®-Listed product is rated for direct burial, allowing it to be

used for below-grade equipotential mat and mesh construction. The connector will accommodate any combination of #4 or #6 AWG solid or stranded conductors, making it suitable for the majority of SRG applications.

ORDERING INFORMATION

Part Number	Description
SRGC46	SRG connector for #4 and #6 AWG solid or stranded wire
SRGC46BR	Pedestal mounting bracket (specify round or square up to 1-1/8" O.D.)

Due to a policy of continual product development, specifications are subject to change without notice.
