

For more than 25 years Gardner Bender has been designing and manufacturing conduit benders for the professional electrician. From the original aluminum hand benders with bubble vials to the work horse Ultra Egor™ Gardner Bender has led the way in conduit bending. GB offers a full line of products to bend any type of conduit, EMT, IMC, Rigid and PVC, for any electrical application.

Cyclone™
Electric Bender

BIG BEN™
Aluminum Hand Bender

GARDNER™
Aluminum Hand Bender

Iron Hand Benders

HotBlanket™
PVC Bender

Electric Sidewinder™ Bender

HotTube™ PVC Bender

Sidewinder™ Mechanical Bender

Ultra Egor™ Hydraulic Bender

HotBox™ PVC Bender

BIG BEN™ Aluminum Hand Bender

Bigger Foot Pedal
For more consistent bends

Built-In Sight-lines
For bending on the floor

Conduit Bend Back Channel
Eassily corrects over bends

Vise-Mate™ Conduit Vise
Holds conduit while
cutting or reaming

Benfield™ Style Angle Markings
For bending in the air

Stronger Hook
Resists breaking

**Lifetime
Warranty**

BIGGER • BOLDER • BETTER

From job site visits to surveying hundreds of contractors GB's marketing and engineering group identified the key desires of end-users for hand conduit benders. In response to the end-user's desires GB's design team "beefed" up several areas of the traditional hand bender to increase durability and improve functionality.

GB's new series of BIG BEN™ aluminum hand benders have improved traditional hand benders by enlarging the hook, increasing the foot pedal size and clearance, highlighting the markings and incorporating a dual sight-line system for bending on the floor or in the air. GB's new BIG BEN™ series offers industry standard Benfield™ markings to simplify the contractor's job. Made of rugged, heat-treated aluminum, the BIG BEN™ series is backed by a lifetime warranty and is available in the most common sizes of 1/2", 3/4" and 1".

Benfield Style

30° bend when handle is straight up.

Bigger Hook

With a 5x durability factor

Bigger Foot Pedal

40% Larger

More Foot Room

Allows for a booted foot

Sight-down Arrows

For bending on the floor

Sight Across Marks

For bending in the air

Bend-Back Channel

Easily corrects conduit over bends

Vise-Mate

Holds conduit while cutting or reaming

1. ARROW

Indicates start of bend. Use for stubs and offset bends.

2. RIM NOTCH

Locates center of saddle bend.

3. STAR

Indicates the back of a 90° bend.

4. ANGLE ARROWS

Indicates the angle when bending on the floor. (sighting down the bender)

5. DEGREE SCALES

Indicates the angle when bending in the air. (sighting in-line with the conduit)
