

DU-ALL DUAL DRAIN WASHING MACHINE OUTLET BOX

INSTALLATION INSTRUCTIONS:

1. Before cementing drain line into washer box coupling, remove drain locator tape and place on top of knock-out test cap inside box over the coupling being plumbed. (See Figures A & B below)
2. Cement drain line and P-Trap assemblies.
3. Connect water supply lines.
4. Cement coupling plug into unplumbed drain coupling.*

* This precautionary step may be eliminated if drain line is tested and inspected for leaks, and test cap over plumbed drain coupling is knocked out, *PRIOR TO HANGING SHEETROCK. IT CAN ALSO BE ELIMINATED IF INSTALLED IN TOP MOUNT POSITION.*

** For top mounted valves simply invert box with valves positioned on top.

RIGHT HAND DRAIN

LEFT HAND DRAIN

IMPORTANT NOTICE FOR PROPER KNOCK-OUT

FIGURE A

Remove Tape from
Drain side to be
Plumbed.
See Figure A

SEE REVERSE SIDE FOR KNOCKOUT INSTRUCTIONS

Apply Tape Inside
Box over Knock-out
to be Plumbed.
See Figure B
