

### Did you know there was a code change concerning outdoor splices?

The goal of King Innovation's

**"Know the Code"** initiative is to provide information to the industry; keeping professionals informed of all requirements in order to reduce the risk of electric shock, corrosion, and product failures. King Innovation DryConn Waterproof Connectors are UL 486D Listed and comply with the 2008, 2011 and 2014 National Electric Code.

**Compliance with the 2008, 2011 and 2014 NEC Handbook means when making a splice in a wet or damp location it is required that a UL 486D Listed splicing method be used. Basically, all outdoor electrical connections require a waterproof connector, even in waterproof enclosures.**

The benefits to Electricians when using DryConn Waterproof Connectors are:

- Installations are made according to the National Electrical Code
- Avoids costly rework due to failed inspections and/or warranty issues
- Avoids connector corrosion at the splice
- Reduces the risk of burnouts and fires
- Complete the job with confidence

## DIRECT BURY CONNECTORS

**KNOW THE CODE!** Direct Bury Connectors are UL 486D Listed and comply with the 2008, 2011 and 2014 National Electric Code

**DRYCONN®**  
WATERPROOF CONNECTORS

### Direct Bury

- UL 486D Listed and 600V rated
- Pre-filled with dielectric silicone sealant that never hardens
- Waterproof and corrosion-proof
- One-step® installation saves time and money
- Direct Bury, no junction box is required
- No pre-twisting required
