

Item # 2121N, 20 Micron Medium Sediment - Complete Filter - 10" Clear Bowl w/Cartridge

Keystone's 20 micron sediment filter is designed to remove fine dirt, dust and particulates in water. Unit comes complete with housing and cartridge and is ideal for use in homes with three baths or less. Keystone's 20 micron sediment cartridges utilize a pleated cartridge to provide a large amount of filtration surface area and greater dirt holding capacity. Dirt is trapped on the outside surfaces of the filter cartridge. The large surface aera of a pleated cartridge greatly increase the life
